

CONCRETE COATINGS INSPECTOR KIT

A compact kit for instant and precise moisture testing of concrete floors and slabs. The Tramex CMEX5 digital moisture meter allows for non-destructive quantitative testing of concrete and comparative testing per ASTM F2659. Non-destructive testing of the top 3/4" of the slab is most critical when applying coatings. An infrared surface thermometer gives surface temperature and dew point conditions used in conjunction with the CMEX5 hygrometer. The Concrete Coatings Inspector Kit comes with an extension handle in a protective heavy-duty carrying case with die-cut foam lining. The Tramex Meters App allows you to GeoTag test results, create, save and share reports and charts, as well as see your meter screen on your phone when extending to hard to reach places.
